09 August 2013

Dear Ms McPhee

This report outlines your patient feedback from the Improving Practice Questionnaire (IPQ). Your results have been illustrated in tables and graphs with associated benchmarks where applicable. Details of score calculation and statistical methods have been provided to help you in the interpretation and understanding of your results. You will also receive an A4 poster summarising your results and a certificate of completion which you may like to display to patients to indicate that you value their views in order to inform positive change within your practice.

If you are carrying out this survey in order to help meet the requirements of the patient participation directed enhanced service (DES) for GMS contract, a guidance template for discussion of these local survey findings and an action plan have been included which may help facilitate discussions with your patient reference group (PRG).

The format of this report has been updated, which we hope will provide you with a clearer picture of performance.

We hope these results give you useful feedback as to how patients rated the practice and its service, and provide you with a basis for reflection. In order to enable us to improve our services we would be grateful if you could complete a feedback form using the following link:

<http://www.cfepsurveys.co.uk/questionnaires/feedback/default.aspx?psid=159083>

Please contact the office on 0845 5197493 or reports@cfepsurveys.co.uk if you require further information about your report.

Yours sincerely

Helen Powell
Survey Manager

Introduction

About the IPQ

The IPQ is a well-established questionnaire widely used in the UK.

Since 2004, over 3,000,000 patients have completed an IPQ providing valuable patient feedback to over 4,000 practices and over 16,000 health practitioners, many of these practices and health practitioners having completed the survey on more than one occasion.

Extensive published validation studies have established that the IPQ is a reliable and sensitive tool: accurately measuring patient satisfaction in designated areas and is sensitive to change - if the IPQ is carried out on more than one occasion any change in patient perception of service can be clearly and reliably monitored.

This report outlines the feedback that has been collected and analysed from a sample of your patients. Full explanation on how to interpret this information can be found in the report. We hope that this feedback is useful and a basis for reflection.

A sample of the IPQ questionnaire is included at the end of this report for reference.

About the benchmarks

Benchmarks are a useful guide as to how your practice performed in relation to all the practices who have carried out an IPQ survey. Benchmark data provided relates to either all practices or according to practice list size (the practice list size benchmarks displayed in this report are representative of your practice), as we have established this plays a part in scores achieved. However, it should be noted that other factors such as geographical location and clinical setting may also affect scores and benchmarks may not always be truly representative. Furthermore as it is not mandatory for a practice to carry out an IPQ survey, benchmarks provided are effectively based on data collected from a *volunteer* sample. Volunteer samples often perform better than an 'average' sample which could make the benchmarks provided artificially high.

Your feedback

From the report you will be able to clearly pinpoint areas where you scored well and also those areas where you might feel that improvements may be needed. However, it is advisable to take time to assimilate all the feedback and to avoid scanning the report and noting specific scores on which too much emphasis can be placed. In fact, the clearest reflection of patient satisfaction can often be seen in the frequency and distribution of patient ratings and in their written comments.

A page by page guide to the interpretation of your report has been incorporated in the supporting documentation at the end of this report which you may find useful.

Other useful information

Together with your report you will receive:

- An A4 poster: to enable you to share the results of your local survey with the patients in your practice.
- A 'Guidance template for discussion of local findings and action plan': completion of which may help you meet the requirements of the patient participation directed enhanced services (DES) for GMS contract, if required.

< 5 years	39	80	73	52	68	73	78	94
5 - 10 years	32	72	72	52	68	74	78	87
> 10 years	40	81	74	53	71	75	78	91
Blank	11	74	71	43	66	71	78	92

*Based on data from 184 practices carrying out 263 surveys between April 2010 and March 2013 with 25 or more responses.

Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group.

Please note the reliability of your patient feedback may be marginally reduced if less than 25 patient ratings per category is achieved. In the event that there are less than 5 patient responses for any question, the corresponding score will not be illustrated.

Please see the supporting documents at the end of this report for percentage score calculation and quartile information.

954€

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- Have to wait 4 weeks for a routine appointment with doctor of choice - too long. Notice saying patients responsibility to make appointment before sickness certificate expires - not always possible if no appointments! Computerised booking system to send text reminders to patients to help reduce missed appointments might be useful.
- None the service is brilliant only thing is that we didn't have to wait 3 weeks to see our doctor but I understand that they are busy.
- I am very happy with the service I receive.
- None - excellent service very impressed!
- Being able to request to see a female doctor for certain reasons (female related).
- Excellent.
- I have just moved to this practice and can't believe how great this practice is in comparison to my previous practice. I feel very lucky to be a patient at this practice and feel we have a great service. All GPs should be like this.
- Got satisfaction.
- I have always been pleased with the service offered by this practice.
- The only problem is not being able to see doctor of choice quickly.
- Excellent all doctors extremely helpful and staff.
- Sometimes have to wait too long for an appointment if it not an emergency, but do need to see a doctor within a few days.
- I'd say in my opinion, it was the best decision I've ever made moving to this practice, on recommendation of friends. And I also feel I can finally be listened to, and not be dismissed like I've felt, at my previous practice.
- Getting a sit and wait appointment is really good but I find a non-emergency appointment too long.
- Only a bigger parking area.
- Satisfaction with the day to arrange appointment.
- Air conditioning.
- None - other to expand for more patients.
- At the moment I am completely satisfied with the level I receive.
- More of this doctor!
- Happy with this doctor. Would be great to be able to see the doctor at shorter notice.
- Should allow appointment to be made in advance. We are not always available to ring first time in the morning or can't get through.
- I think we should be able to order repeat prescriptions over the phone.
- I really am so happy with this service, it is excellent standard staff are always polite, have a smile which goes a long way. Staff are always willing to help.
- Am always 100% satisfied with the service provided.
- Appointment booked too far away e.g. waiting time to see a doctor (unless an emergency) is 4 weeks.
- None I would recommend the practice to anyone. The staff always go the extra mile and have been excellent throughout my care and any requirements.
- Very very pleased with all doctors and nurses and staff. A great practice.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- I am so pleased I came to this practice you was recommended by someone. My only gripe is that I can never get an appointment on the day. I have to wait for a cancellation or have an appointment for my doctor in say 2 weeks time. The good thing is that I can get them to ring me at home on that day when I know things are not good. Even hard to make a appointment online also have to wait for 2 week.
- More appointments with any chosen doctor need to be available.
- More people on the phone, during some periods of the day are busy and can't get through. But are always helpful and pleasant.

Any comments about how the doctor/nurse could improve?

- Online appointment booking system.
- I believe you cannot improve on a service that is excellent.
- The doctors couldn't prove anything at all they always do a great job.
- None - very happy with my doctor!
- Fantastic to have this doctor.
- Excellent.
- Excellent doctors. Would not change doctors to somewhere else have helped me and my family a lot.
- None. Absolutely lovely, kind, considerate and listened.
- Excellent.
- I'd just like to say as a new patient, nothing needs changing. Thank you for all your help and support.
- None - both doctors are excellent doctors.
- I think you're very rushed in your appointment it makes you feel like they are rushing and not checking your properly.
- None. This GP has an excellent knowledge and willingness to learn about my rare condition.
- Brilliant every time I have visited the doctor I am always happy. They make me feel at ease and don't feel worried about coming to the doctors. I feel I could talk to the doctor about any of my concerns.
- Simply the very best can't praise you all enough.
- No I think you're all great smiling, polite and helpful. It's a lovely practice a lot better than my previous practice. You are looking into more things for me to find out what is causing my problems than my other practice ever did.

Details of score calculation

The score provided for each question in this questionnaire is the mean (average) value of all of the ratings from all patients who completed the question. It is expressed as a percentage - so the best possible score is 100%.

Example using data from your Q1 Opening hours satisfaction

Total number of patients responses = 122

Questionnaire rating scale	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Number of ratings	0	5	27	45	45	0

Value assigned to each rating	0	25	50	75	100	n/a

$$\frac{(\text{number of Poor ratings} \times 0) + (\text{number of Fair ratings} \times 25) + (\text{number of Good ratings} \times 50) + (\text{number of Very Good ratings} \times 75) + (\text{number of Excellent ratings} \times 100)}{(\text{Total number of patient responses} - \text{number of blank/spoilt})} = \frac{(0 \times 0) + (5 \times 25) + (27 \times 50) + (45 \times 75) + (45 \times 100)}{(122 - 0)} = 9,350/122$$

Your mean percentage score for Q1 = 77%

Explanation of quartiles

In statistics a quartile is any one of the three values that divide data into four equal parts, each part represents ¼ of the sampled population.

Quartiles comprise:

- Lower quartile, below which lies the lowest 25% of the data
- The median, cuts the data set in half
- Upper quartile, above which lies the top 25% of the data

Please note that the benchmarks presented in this report are based on data obtained from a volunteer sample of practices, and as such may be artificially high.

Question	Your mean score (%)
Q1 Opening hours satisfaction	77

Benchmark data (%)*				
Min	Lower quartile	Median	Upper quartile	Max
23	64	68	73	92

9541

*Based on data from 927 practices carrying out 1,326 surveys between April 2010 and March 2013 with 25 or more responses.

Supporting documents

Page by page guide to the interpretation of your report

Page 1

The frequency distribution table (table 1) shows the number of patient ratings from poor to excellent and the number of 'blank/spoilt' responses for every question (a blank response is where a patient did not respond to the question and a spoilt response is where more than one tick box option was chosen or if the questionnaire was defaced). If these values are added up, for any one question, this will equate to the total number of patients surveyed (shown in the top right hand corner of the page). This table clearly shows the degree of satisfaction patients have with each aspect of the practice considered. Please note the spread of the ratings. Are they widely spread or closely packed around one or two specific ratings? One or two higher or lower ratings can make a big difference to your mean percentage scores illustrated in tables 2 and 3.

Page 2

The mean percentage score and benchmark table (table 2) illustrates your mean percentage scores for each question calculated from the data in table 1. Each score is the mean (average) score calculated from valid patient ratings (i.e. not the blank/spoilt responses) expressed as a percentage (see score calculation sheet also in the supporting document section of your report). It has been established by our statisticians that the reliability of your patient feedback for any one question may be marginally reduced if less than 25 valid patient responses is achieved (this number can be determined from table 1). In the event that there are less than 5 patient responses, the corresponding score for the question will not be illustrated.

Your scores have been displayed in colour coded boxes to indicate how your score falls within the benchmark data (within the highest 25%, the middle 50% or the lowest 25% of all the mean percentage scores achieved by all practices in the benchmark sample). The provenance of the benchmark data is provided in the footer below the table.

Graph 1 illustrates your mean percentage scores in ascending order of performance with benchmark means from all participating practices.

Page 3

Table 3 and graph 2 are the same as for page 2, but with benchmarks provided relevant to your practice list size. Evidence indicates that practices with smaller list sizes tend to perform better than those with larger list sizes.

Page 4

Table 4 shows the number of patient responses from each 'demographic' group detailed on the questionnaire i.e. age, gender, if the patient saw their usual practitioner or not and the number of years attending the practice. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group.

Associated benchmark mean scores relevant to your practice list size are also provided.

The same criteria concerning reliability of the feedback as explained in Page 2 above applies.

Page 5

Patient comments usually reflect scores achieved. The IPQ was designed to simulate the patient's chronological journey through their visit to the practice. Although the questions in the IPQ are generic, comments can pinpoint specific issues identified by the patient from any part of this journey. If there is a particular problem within the practice e.g. getting through in the morning on the telephone or the lack of chairs in the waiting room suitable for the elderly, this can be clearly picked up in the themes and frequency of comments.

In order to ensure patient anonymity, any personal identifiers are removed. In the unlikely event that we receive a written comment which might relate to serious professional misconduct (e.g. allegations of sexual assault), the comment would be referred to our Clinical Associate who would discuss the matter with you.

Improving Practice Questionnaire

OFFICE USE ONLY	Org ID
	Survey ID
	Practitioner ID

You can help this general practice improve its service

- This practice would welcome your honest feedback
- Please read and complete this survey after you have seen the
- All the information provided by patients is put together in a report for the practice. Your answers will not be identifiable. Any comments you make will be included but all attempts will be made to remove information that could identify you.
- Once completed, please return this survey to reception in the envelope provided

Please mark the box like this with a blue or black ball-point pen. If you change your mind just cross out your old response and make your new choice.

When giving your feedback, please only consider the consultation you have had today.
